IPL (Intense Pulsed Light) HAIR REMOVAL

IPL Hair Removal is an effective and safe method of hair removal on all types of hair, we use the latest technology in Intense Pulsed Light to permanently reduce hair from the body and face. IPL hair removal is a hair removing procedure that uses various frequencies of light to damage the hair follicles and eventually inhibit the growth of hair.

Our IPL hair removal system produces a high intensity flash of filtered light from the applicator head, which is placed in contact with the skin. The energy from the light is absorbed by the pigment melanin, which is the chromosomes that gives the hair its' colour. The hair acts as a conductor of the light and effectively turns it into heat to raise the temperature of the surrounding cells to 70 degree centigrade or more. The heating denatures, or kills, the cells making them incapable of producing further hair growth.

LASER HAIR REMOVAL

Laser Hair Removal is a highly effective and safe method of hair removal, we use the latest technology in Lasers to permanently reduce hair from the body and face. The majority of our clients have experienced amazing results and even permanent hair elimination between 80-90%. The length of a treatment time depends on the size of the area being treated and the density of your hair. Book your test patch and consultation today to understand how you can benefit from Laser hair removal and stop shaving, plucking and waxing!

Advantages of Laser Hair Removal

- Laser hair removal is painless and bloodless.
- Laser treatment is safe for sensitive areas near the eyes and mouth.
- Laser hair removal gives smooth skin and enhances the beauty of the person.
- The treatment is quick and more effective than any other method of hair removal like shaving or waxing.

IPL & LASER THREAD VEIN REMOVAL

IPL & Laser treatments target imperfections in the skin from sun damage, acne to pigmentation and thread veins. Laser and IPL is used to promote collagen production and aid hydration giving a smoother glowing fresher complexion.

Thread veins, spider veins and broken veins is a very common problem. These veins have the appearance of small fine flat red veins or thicker purplish veins on the surface of the leg or face.

Thread veins are small blood vessels that can, over-time, develop into larger blood vessels. Leg thread veins can be removed quickly and easily leaving your legs smoother and even-toned.

Area	Small	Medium	Large
Face	£69	£99	£129
Arms	£89	£109	£149
Legs	£99	£119	£200
Patch Tests	£25	0	0

Before

After

The end result will be clearer, less defined thread veins.

REJUVENATION / PIGMENTATION / ACNE TREATMENTS

IPL Photo Rejuvenation treatments can be used to help restore the skin's youthful appearance. The treatment improves the appearance of photo aged skin, removes age spots (sun-induced freckles), most benign brown pigments, and redness caused by broken capillaries through a process called photo rejuvenation for face and body.

IPL Photo rejuvenation is a non-invasive **treatment** that gently corrects the effects of photo **aging and sun damage**.

Treatment	Course of 3	Course of 6
Ipl / Rejuvenation @£210	£525	£1,050
Age Spot @ £89	£223	£445
Sun Damage @£89	£223	£445
Hyper Pigmentation @£89	£248	£495
Acne Treatment @ £89	£248	£495

MICRODERMABRASION

Microdermabrasion is perfect if you want your skin to look younger and remove blemishes. It is one of the most effective anti-aging treatment available, painlessly exfoliating deep within skin.

Microdermabrasion provides immediate and visible results for ageing skin, lines and wrinkles, open pores, blackheads, pigmentation, blemish scars, acne scars, stretch marks and so much more. You'll see the difference after just one treatment however for more problematic skin a course of treatments may be required.

Has great benefits for the following concerns

- Dry/flaking skin
- Fine lines and wrinkles
- Pigmentation
- Open pores/Congested skin
- Acne scarring
- Sun damaged and uneven skin tones

MICRODERMABRASION

Microdermabrasion, tiny crystals are sprayed onto the skin to gently remove the outer layer of your skin. An exfoliation and skin rejuvenation procedure that leaves skin looking softer and brighter.

Microdermabrasion is a progressive procedure. After the first session your skin will feel softer and you may see a very subtle improvement. Generally a course of sessions is required to gain visible improvement. Your skin however will improve with additional treatments as increased circulation is noted within the dermis and newer, healthier skin cells are produced.

Area	Price per sess	Course of 3	Course of 6
Hands	£69	£175	£350
Face	£69	£175	£350
Full Face + Neck	£89	£250	£450
Full Face + Neck + Chest	£99	£297	£495
Back + Chest	£129	£387	£650
Legs	£250	£410	£725

NON SURGICAL FACELIFT

The RF skin tightening treatments use monopolar radio frequency modalities to heat subcutaneous dermal tissue using a handpiece emitting RF waves. This causes contraction of the existing collagen fibres, encourages fibroblast migration and promotes new collagen growth that helps with skin tightening and as an anti wrinkle treatment to improve the outer architecture of the skin.

The goal of the radio frequency skin tightening is to restore a more youthful look by helping to reverse the signs of ageing and gravity. The radio frequency treatment achieves:

- The skin tightening and smoothing of skin resulting in a reduced appearance of fine lines and wrinkles;
- The skin tightening of sagging skin around the jowls and neck;
- A reduction in the appearance of double chins;
- As an anti wrinkle treatment it has improvement of skin laxity;
- A noticeable improvement in skin tone.

ELECTROPORATION NON SURGICAL FACELIFT

Electroporation involves the local application of short, intense electrical impulses, which makes cells more permeable to the active ingredients, thanks to the temporary formation of pores on the plasmatic membranes. A true needleless injection which has a bio stimulating (e.g. vitamin and amino acid), draining, liporeduction action.

The noninvasive process is often used for wrinkle lifting, pigmentation reduction, whitening, and to achieve an overall more youthful appearance. After treatment, patients commonly describe skin as appearing and feeling rejuvenated, refreshed, smooth, radiant, more glow, and firmer.

There are no risks or side effects. Treatments are generally described as comfortable but sometimes are said to feel like a 'pins and needles' sensation.

ADVANCED SKIN & FAT LOSS TREATMENTS

TLC Fusiomed ICE is a revolutionary technology that combines the actions of five different technologies in a single platform, to achieve a powerful synergy able to produce dramatic improvement in several skin conditions.

CRYO LIPOLYSIS

Cryo Lipolysis is a non-invasive procedure, which uses cooling technology that results in localised fat reduction. Studies on Cryo Lipolysis have shown reduction of fat is between 20% to 40%. Each session lasts for 30 minutes.

Area	Price per sess	Course of 6
Upper Stomach	£200	£1,000
Lower Stomach	£200	£1,000
Thighs	£265	£1,325
Hips	£295	£1,475
Arms	£295	£1,475

Before

After

ADVANCED SKIN & FAT LOSS TREATMENTS

Cavitation + Lymphatic Drainage

Cavitation is a pain free non-invasive technique used for fat reduction. It's a effective way of reducing cellulite and fat from areas such arms, abdomen, love handles, legs and bottom. When combined with radio frequency great results are achieved. Generally results are seen after just one session.

Area	Price per Session	Course of 6
Upper Stomach	£179	£895
Lower Stomach	£179	£895
Thighs 2 Areas	£259	£1,295
Hips 2 Areas	£259	£1,295
Arms 2 Areas	£259	£1,295
Bottom 2 Areas	£259	£1,295

When cavitation is followed by a lymphatic drainage treatment, the process is faster, as the drainage is very effective eliminating liquids.

ADVANCED SKIN & FAT LOSS TREATMENTS

Radio Frequency (RF)

Radiofrequency is a procedure that uses radio frequency energy to rejuvenate body and facial features without the need for incisions or long recovery times. The Radiofrequency energy induces heat within the dermis without affecting the outer layers of the skin (the epidermis) and stimulates new collagen growth, resulting in tightening and firming of the skin.

Area	Price per sess	Course of 3	Course of 6
Upper Stomach	£99	£235	£495
Lower Stomach	£99	£235	£495
Thigh's (2 Areas)	£179	£435	£895
Hips (2 Areas)	£179	£435	£895
Arms (2 Areas)	£179	£435	£895
Bottom(2 Areas)	£179	£435	£895

Before

After

ADVANCED SKIN TIGHTENING TREATMENTS

Face and Neck Lifts - RF Facials

Radiofrequency Facials will help you looking younger and refreshed. The RF helps to produce collagen and new skin elastin, resulting in the reduction of wrinkles and a natural lifting affect. This treatment is for the face and neck.

Area	Price per sess	Course of 3	Course of 6
Jawline	£99	£245	£495
Chin	£99	£245	£495
Forehead	£99	£245	£495
Full Face	£99	£245	£495
Full Face + Neck	£109	£290	£550
